Convert your scores with the following key:

*Less than 20: Low Resilience:* You may have trouble handling pressure or setbacks, and may feel deeply hurt by any criticism. When things don't go well, you may feel helpless and without hope. Consider seeking counsel or support in developing your resiliency skills from a trusted friend or relative. Connect with others who share your developmental goals.

*20-30: Some Resilience:* You have some valuable pro-resiliency skills, but also plenty of room for improvement. Strive to strengthen the characteristics you already have and to cultivate the characteristics you lack. You may also wish to seek some outside coaching or support.

*30-35: Adequate Resilience:* You are a self-motivated learner who recovers well from most challenges. Learning more about resilience, and consciously building your resiliency skills, will empower you to find more joy in life, even in the face of adversity.

*35-45: Highly Resilient:* You bounce back well from life's setbacks and can thrive even under pressure. You could be of service to others who are trying to cope better with adversity.
